**Oregon Academy of General Dentistry
Presents:**

OAGD-AAID Implant MaxiCourse®

Comprehensive Training Program in Implant Dentistry

This is one of the most comprehensive continuing education program about implant dentistry. Presenters include renowned university faculty, world-class clinicians and top authorities in implant dentistry.

The program will be presented over a 10 month period. This course is a must for all dentists, both general dentists and specialists, whose goal is to become proficient in implant dentistry. The participation segment is a hands-on opportunity to place implants after having case presentations reviewed by faculty and colleagues.

Course Objectives:

This course will enable participants to:

- Discuss the basic sciences as they relate to implant dentistry
- Formulate a comprehensive approach to diagnosis and treatment planning related to implant dentistry
- Assess the many implant systems, their advantages or disadvantages and applications
- Observe live surgical and prosthetic implant demonstrations on patients and allow participants to place implants on their own patients under direct supervision.

Ten 3- Day Sessions: The program includes 300 hours of didactic instruction, which includes some online sessions, plus 80 hours that are Participation/Hands-On sessions as directed by the course instructors. To receive credit for the online sessions, participants will be required to submit answers to questions about the content within a given time period.

Each didactic, clinical and hands- on sessions will take place at Lane Community College, Eugene, Oregon.

Sponsors Include:

Salvin Dental Specialties, Tatum Surgical, and Osteogenic Biomedical, Inc.

Schedule/Dates:

The order of subject presentations is subject to change.

" Finally, an AAID MaxiCourse® in the Northwest!

This program provided a unique opportunity for me and my staff to be trained and supervised performing implant surgery in a surgical setting on our own patients.

The didactic program was extremely comprehensive and continually highlighted with world class presenters.

The leadership from course director Dr. Shane Samy was consistently encouraging and supportive. Although I had previous quality experiences, including the Misch Institute, the surgical experiences in this program finally gave me the confidence to begin placing dental implants in my own office.

This program is an important addition to any practitioner's implant resume."

Dale L Petrich, DDS Seattle, WA
