

### **Trial Smiles**

Susan Hollar, D.D.S.

### **Overview**

Trial smiles create space for the dentist, dental staff, technician and patient to co-create and explore possibilities together. Temporary smiles not only inspire patients, but help insure diagnostic and treatment success. Attendees will leave this lecture with a technique that they can begin using immediately. Also, participants will learn the importance of planning stages, develop an understanding for the importance of photography in their practice and see what could be when everyone is playing. Come and learn a simple and powerful technique that will become an invaluable tool in your practice.

### **Objectives:**

- Create trial smiles using composite bonding
- Motivate your patients and to have them gain trust in your skills
- Generate more cosmetic and restorative dentistry in your practice
- Utilize the trial smile in treatment planning and fabricating provisional restorations
- Transform provisional finesse into permanent success

### **2012 Dates and Location**

Friday, May 18, 2012

Location: Ponzi Vineyard

7 Lecture CE Credits

Tuition: \$150

*Lecture is limited to 40 participants.*

### **About the Clinician**

A graduate of Baylor College of Dentistry, Dr. Susan Hollar maintains a private practice in Arlington, Texas where she limits her practice to reconstructive and aesthetic dentistry. She is accredited by the American Academy of Cosmetic Dentistry and one of 43 Pankey Scholars. She serves as visiting faculty with the L. D. Pankey Institute and the Scottsdale Center for Dentistry. She is an examiner with the American Academy of Cosmetic Dentistry, a board member of the American Board of Cosmetic Dentistry, and past editor of the Accreditation Essentials for the Journal of Cosmetic Dentistry. She is a frequent national lecturer on cosmetic dentistry.
